1. **Name of the Company: ALGOORIT INNOVATIONS PRIVATE LIMITED**

2. **Short Description of Company (One Paragraph/200 Characters):**
   Algoorbit Innovations Private Limited is a growing IT company focused on software development, AI-driven solutions, and technology consultancy, with a strong emphasis on practical learning and industry-aligned education.

3. **About Company (1000 Characters):**

   Algoorbit Innovations Private Limited is a growing IT company focused on delivering modern software solutions, AI-based systems, and end-to-end technology consultancy services for startups, institutions, and businesses. The company works on real-world projects involving web applications, automation, data analytics, and AI-driven solutions, helping organizations adopt efficient and scalable digital systems.
   Along with consultancy, Algoorbit also contributes to skill development by offering structured professional training programs designed to align academic learning with industry expectations. The training approach emphasizes practical implementation, real project exposure, and mentorship to strengthen technical fundamentals and problem-solving abilities. Algoorbit Innovations aims to build a strong ecosystem where technology, innovation, and learning come together to create industry-ready professionals and reliable digital solutions.

5. **Phone no (Company):** +91 94821 19446

6. **Domain:** IT and Technology

7. **Website (Company):** https://www.algoorbit.in

8. **Full Address of the Company with pin code:**

   ALGOORBIT INNOVATIONS PRIVATE LIMITED
   C/O SUJATHA, W/O HARISH, NEAR HAIGOLI HOUSE, Mala, Karkala, Udupi- 574122, Karnataka

9. **Company Logo:**

10. **Internship Title:** SOFTWARE DEVELOPMENT ENGINEER INTERN

11. **Short Description of Internship offered (One Paragraph/200 Characters):**
    A **4-month offline Software Development Engineer internship** focused on real-world software development, problem-solving, and application building. Interns gain hands-on experience through mentorship, code reviews, and project-based learning.

12. **About Internship (1000 Characters):**

    The Software Development Engineer (SDE) Internship at ALGOORBIT INNOVATIONS PRIVATE LIMITED is a structured 4-month program designed to provide students with hands-on experience in real-world software development and engineering practices**.**
    Interns will work on activities such as software requirement analysis, coding, debugging, testing, and application development, based on their skill level and project needs.

    The internship focuses on practical learning through guided development projects**,** regular mentoring sessions, and weekly progress reviews**.**
    Interns will gain experience with programming languages, development frameworks, version control systems (such as Git), databases, and basic

system design concepts, along with best practices for writing clean, efficient, and maintainable code.

Throughout the program, students will be encouraged to strengthen their logical thinking, problem-solving skills, coding practices, teamwork, and professional communication abilities.
They will also learn how software projects are planned, developed, tested, and deployed in a real industry environment.

At the end of the internship, interns will submit a completed software development project with proper documentation, code structure, and working functionality, and will receive an internship completion certificate.
This internship is designed to bridge the gap between academic knowledge and real-world software engineering industry expectations.

13. Internship Mode (Offline/Online): Offline

14. Duration: 4 months
