Summary

I am Supriya, an innovative and detail-oriented 4th-year Computer Science student specializing in problem-solving, software development, and emerging technologies. I leverage technical expertise and analytical thinking to design efficient, real-world solutions. I am eager to contribute adaptability and creativity to a forward-thinking, technology-driven organization while delivering long-term value and growth.

Education

Shri Madhwa Vadiraja Institute of Technology & Management, Bantakal *2022 —Present*
Bachelor of Engineering in Computer Science **CGPA: 8.7**

Shyamili INDP PU College, Kidiyoor *2022*
Pre-University Course (PUC) **Percentage: 93.5%**

Shree Narayana Guru English Medium School, Malpe *2020*
SSLC **Percentage: 96.16%**

Skills

Programming Languages: C, Java, Python
Frontend: HTML, CSS, React.js
Backend & Databases: MySQL, MongoDB, Node.js, Express.js
Tools: Github, Git, Docker, VS Code

Projects

Traffic Flow Prediction Using Machine Learning *Developer — 2026*

Technologies: HTML, CSS, JavaScript (Leaflet.js, Chart.js), Node.js, Express.js, Python (Flask, FastAPI), NumPy, Pandas

- Built a two-server system using Node.js and Python (Flask, FastAPI) integrated through RESTful APIs.
- Developed traffic visualization using Leaflet maps and Chart.js with machine learning-based prediction.

AIONYX-Learning & Placement Preparation Platform *Developer —2026*

Technologies: HTML, CSS, JavaScript, Node.js, Express.js, PostgreSQL

- Built a full-stack platform with authentication and admin content management.
- Developed student dashboard to track learning progress.

Cloud-Based Image Upload & Metadata Service *Developer —2025*

Technologies: AWS API Gateway, Lambda (Python), S3, DynamoDB, LocalStack

- Built a secure serverless image upload and management service using AWS S3 and DynamoDB.
- Tested and simulated REST APIs locally using LocalStack.

AI-Powered Multilingual Audio-to-Text Conversion and Summarization *Developer —2024*

Technologies: Google Speech API, Hugging Face Transformers, Multilingual NLP

- Built an AI-based multilingual audio transcription and summarization tool supporting English, Hindi and Kannada.
- Developed a responsive web interface using HTML, CSS, and JavaScript.

Activities & Achievements

- **First Place – Frontend Designing Competition** — Awarded for creativity and technical skills in frontend design.
- **Internal Hackathon Finalist** — Participated in an internal hackathon and qualified for the final round.

CERTIFICATIONS

- **Kyndryl AWS Bootcamp** — Attended cloud sessions, earned 5 AWS skill badges, and completed hands-on AWS course.
- **CodeChef** — Learned C Programming through online practice and tutorials.
- **Infosys Springboard** — Completed courses in Cloud Computing, Java Essentials & Progressive Web Applications.
